

RAMISAH MOHD SHAH

Dr.

EDUCATION

B.Agric.Sc., MSc. (UPM) PhD. (Murdoch University)

RESEARCH CONTRIBUTION & ACHIEVEMENT

My research goal is to understand the management and utilization of crop genetic resources for future agriculture and food security. The main focus of my study are agronomical and molecular insight of selected crop in Malaysia. We are working on understanding underutilised fruits, herbs and major staple food in Malaysia which is rice. There are several aspects including crop physiology and molecular mechanisms, nutrient composition and postharvest diseases are the major interest. Therefore we are encouraging collaborations with other research partners from national and international bodies to work as a team for the same goal. We also strongly encourage postgraduate and postdoc applicants to explore the fascinating of crop sciences world together.
